

Getting Started with the Copilot for 30 Dashboard

A step-by-step guide to downloading your ASPXi customer propensity data and loading it into the Power BI dashboard.

What it is

The Copilot for 30 Dashboard is a Power BI dashboard that integrates with your ASPXi partner data. You download your Copilot Opportunities propensity data from ASPXi, import it into the Power BI template, refresh the report, and the dashboard renders your customer view.

What you'll need

- **ASPXi access:** the partner insights portal at aspxi.microsoft.com.
- **Power BI Desktop:** used to open the template, import the data and refresh the report.
- **The template:** the Power BI file from the [bosh345/copilotfor30](https://github.com/bosh345/copilotfor30) repository on GitHub.

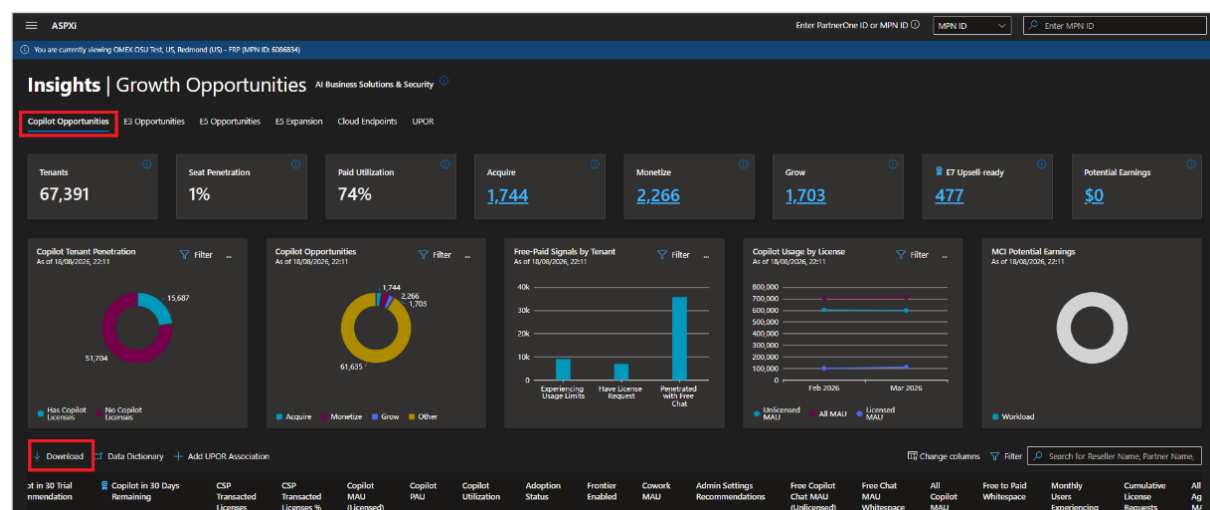

At a glance

Step	What you do
1. Download your data	Export Copilot Opportunities propensity data from ASPXi.
2. Get the template	Download the Power BI template from GitHub.
3. Connect the data	Use Get data in the Power BI ribbon to import the ASPXi export.
4. Load Sheet1	Select Sheet1 in the Navigator and click Load.
5. Refresh	Click Refresh now to populate the visuals.
6. Review	Confirm the dashboard and customer table are showing data.

1. Download your data from ASPXi

Navigate to <https://aspxi.microsoft.com>.

Select 'Copilot Opportunities' and then select the 'Download' button to download all of your customer propensity data.

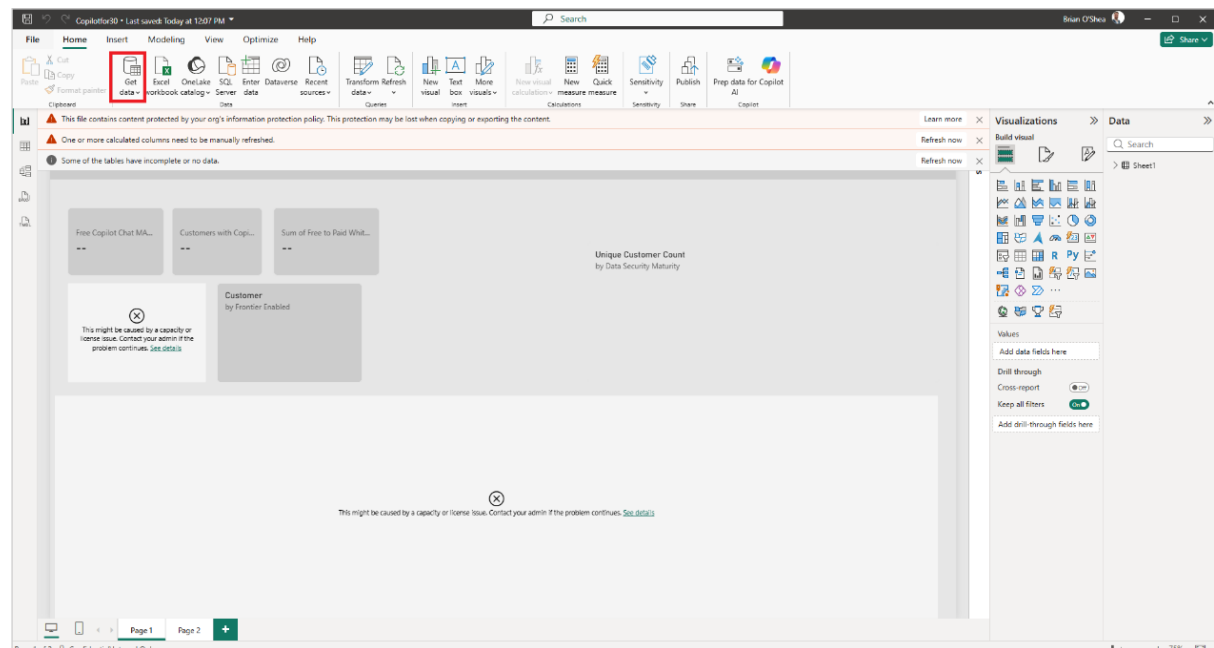

ASPXi Insights — Growth Opportunities: the Copilot Opportunities tab and the Download button.

2. Download the Power BI template

Download the Power BI template from GitHub here — [bosh345/copilotfor30](https://github.com/bosh345/copilotfor30): Power BI Dashboard that integrates with your ASPXi Partner Data.

3. Connect the data in Power BI

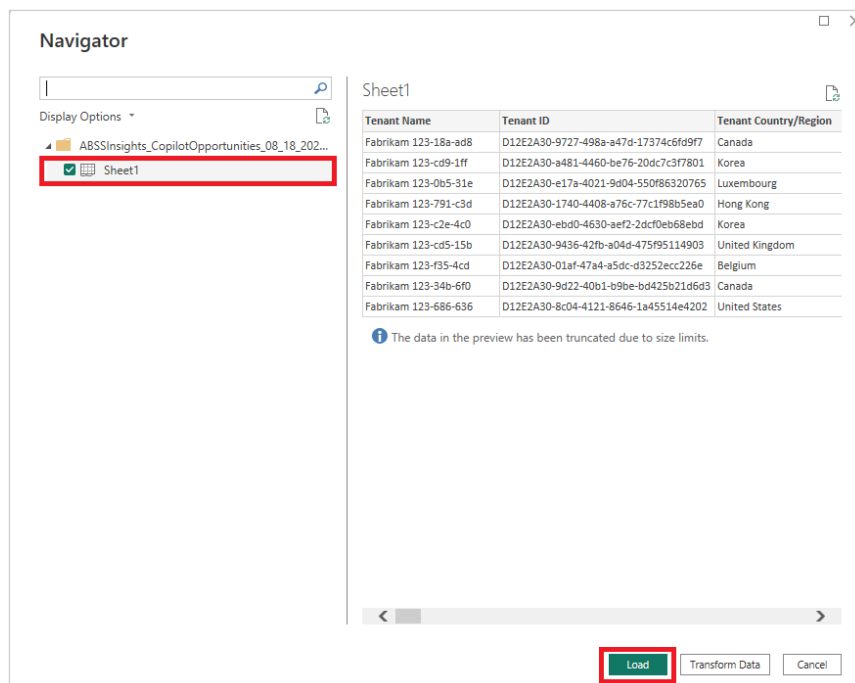

Open the Power BI template. Once the template has loaded you will need to connect the data. Choose **'Get data'** from the top ribbon and import the ASPXi data you downloaded in Step 1.

Power BI Desktop — Get data on the Home ribbon.

4. Select Sheet1 and load

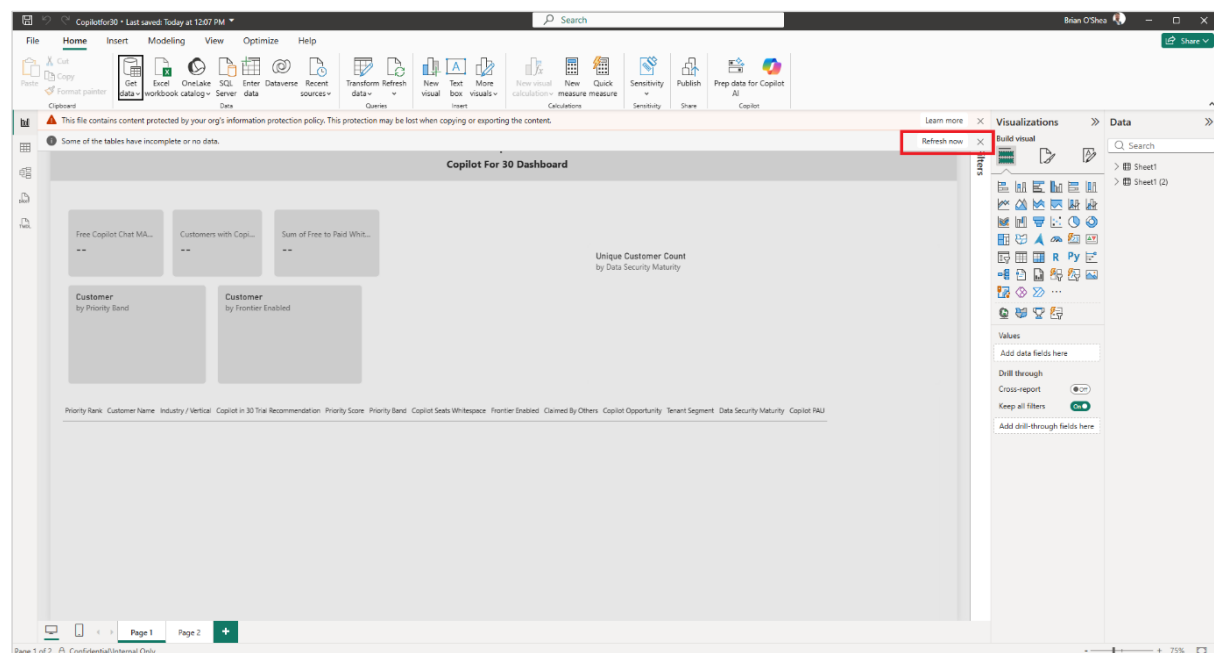

In the Navigator window, select **'Sheet1'** and then click **Load**.

Navigator — Sheet1 selected, ready to load.

5. Refresh to load your data

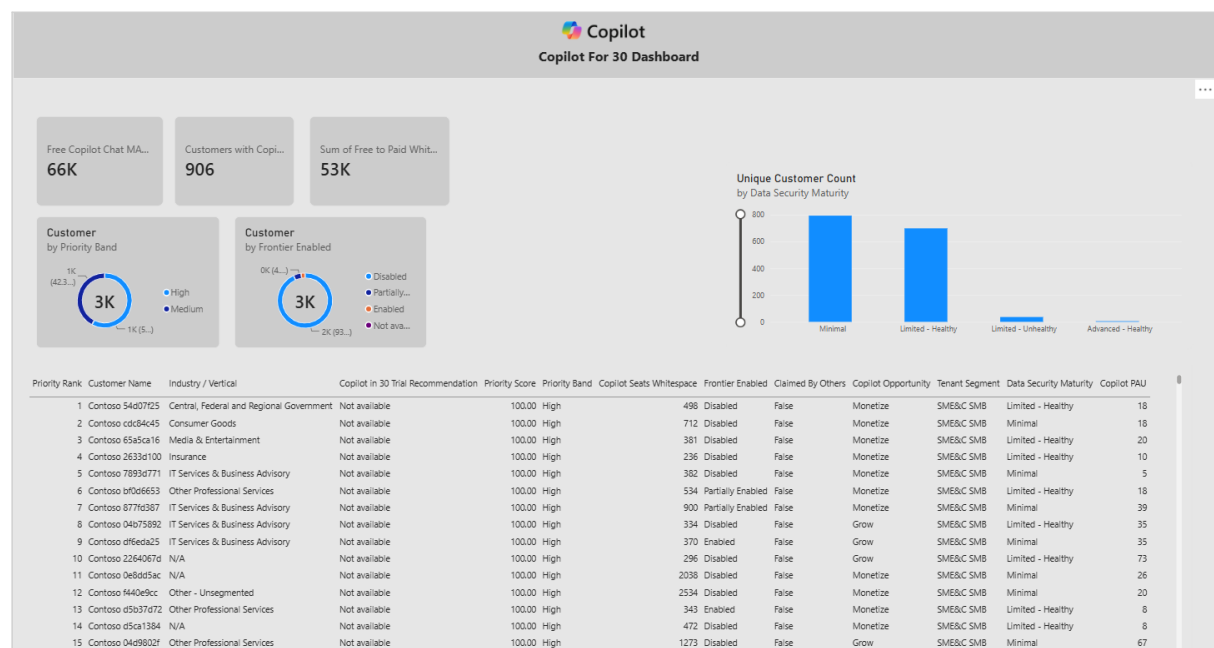

Click **'Refresh now'** in the top right to load your data.

Power BI Desktop — the Refresh now prompt above the report canvas.

6. Review your dashboard

You should now have a view of the Copilot for 30 Dashboard and data.

Copilot For 30 Dashboard — populated visuals and the prioritised customer table.

Next steps: Refer to the GitHub Readme for instructions on the dashboard — [bosh345/copilotfor30](https://github.com/bosh345/copilotfor30): Power BI Dashboard that integrates with your ASPXi Partner Data.
